

DAC-102/DAE-101 2026

Mehta Family School of Data Science and Artificial Intelligence, IIT Roorkee

Project 2

Logisim Project:

Implement a microprocessor in Logisim Evolution (<https://github.com/logisim-evolution/logisim-evolution>) capable of executing all RV32I (Base Integer Instructions) except the 'ecall' and 'ebreak' instructions.

Note:

1. Your submission should be in the form of a Logisim Circuit File (the extension for such files is .circ)
2. The submissions will be checked for plagiarism. Do not copy someone else's design or use Generative AI tools or copy from any website.
